

INSTRUCTIONS:

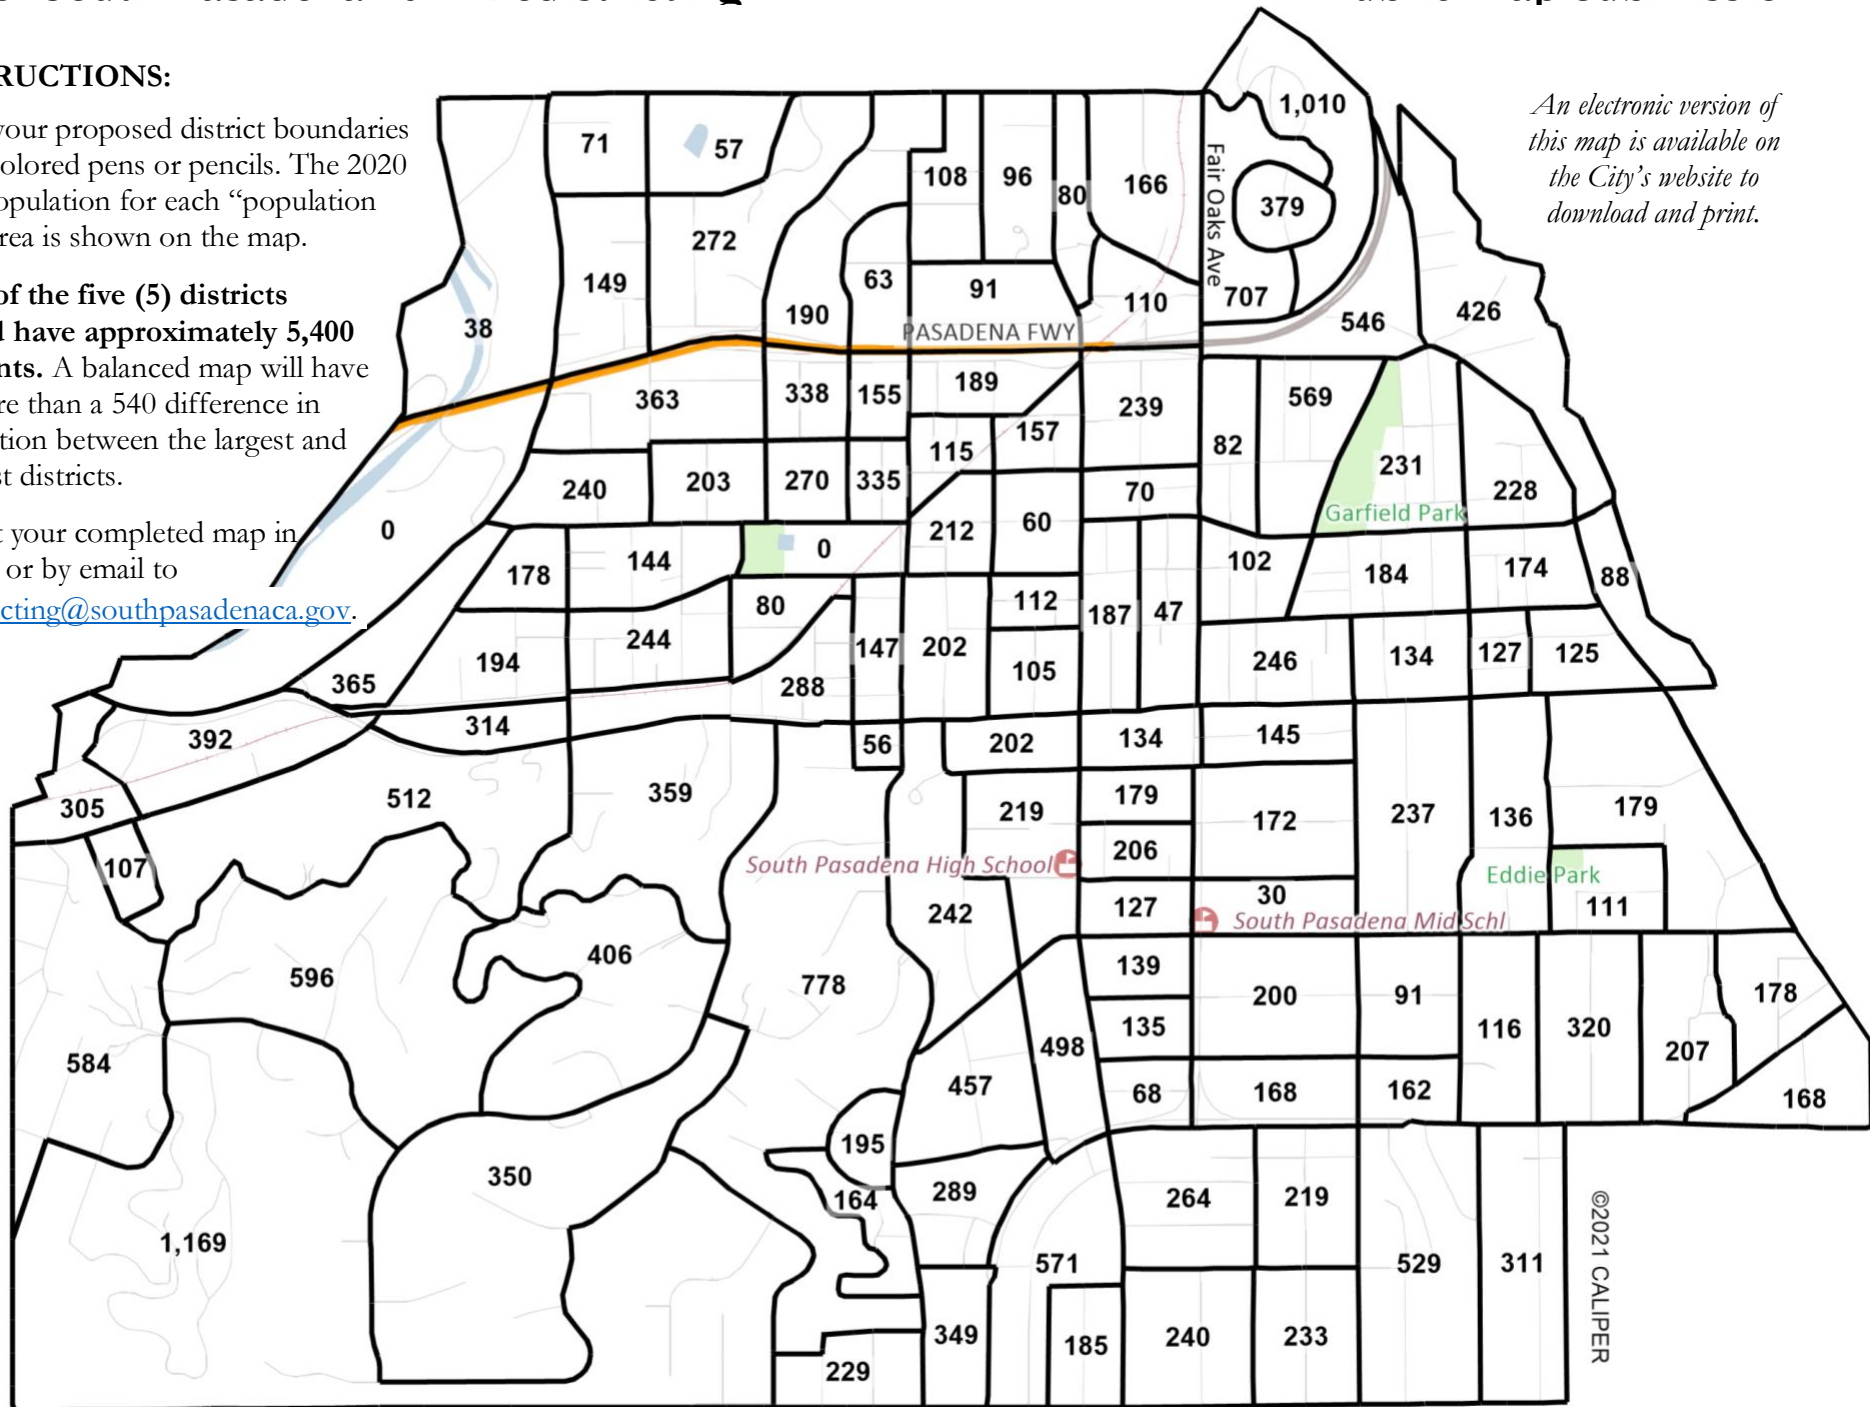

Draw your proposed district boundaries using colored pens or pencils. The 2020 total population for each “population unit” area is shown on the map.

Each of the five (5) districts should have approximately 5,400 residents. A balanced map will have no more than a 540 difference in population between the largest and smallest districts.

Submit your completed map in person or by email to redistricting@southpasadenaca.gov.

An electronic version of this map is available on the City’s website to download and print.
